The National Maintenance Agreements Policy Committee, Inc. (NMAPC) is proud to showcase the top signatory contractors and owners that utilized the NMA in 2019.

Here are the top 50 signatory contractors that performed the most construction and maintenance work hours under the NMA last year. **TAUC Governing Members are denoted by an asterisk next to their name and shaded row.** Work hours figures are based on data received through mid-July 2020.

Together, these 50 contractors performed more than **36 million work hours** under the NMA program in 2019. If your company is signatory to the NMA and is not on this list, but you did a significant number of work hours under the program, it may be due to the fact that you are not adequately reporting your work hours on NMAPC.org. For assistance in reporting work hours, please feel free to contact the NMAPC office at (703) 841-9707, ext. 118.

After the Top 50 list, you will find a listing of the top owners that utilized the NMA, as well as breakdowns of NMA work hours by craft, industry and state.
